RACING RULES REMINDER

Fellow racers,

The latest cycle of Racing Rules of Sailing (2021-2024) comes with significant changes from the previous cycle. Part 2 of the rule book contains the bulk of the rules a racer must be familiar with and it's titled "When Boats Meet".

The basic principle for which the rules of sailing are applied is to avoid collisions.

There are general rules that every sailor should keep in mind:

- Always sail with common sense, safety, and good sportsmanship.
- Right-of-way is not an excuse to cause a collision. All boats are required by the rules to avoid a collision if possible.

It is important that while we are on the water we adhere to the rules when we are racing or just out for a leisurely sail.

Safe racing,

GNS Race Management Team
